

NG Hoo Ming
Deputy Chief Executive (Operations),
Cyber Security Agency

Ng Hoo Ming is in charge of the National Cyber Security Centre within the Cyber Security Agency of Singapore (CSA). CSA was established in April 2015 under the Prime Minister's Office as a centralised agency to coordinate all cyber security matters.

Hoo Ming graduated with a Dip D'Ingenierie Informatique (Computer Science) from Ecole Superieur d'Informatique, France, on a French Government Scholarship in 1989. He was posted to the Information Technology Security Division within the Ministry of Home Affairs upon returning from his studies.

Hoo Ming started his career as a security R&D engineer developing security products for the Singapore Government. In the later part of his career, Hoo Ming assumed the role of IT security consultant, advising Government Ministries on IT security need. He was also involved in numerous national level projects such as the electronic road pricing system, the national cash card system and C4I system with the Ministries of Home Affairs.

Prior to his current appointment, Hoo Ming was Director in charge of the then newly formed Singapore Infocomms Technology Security Authority (SITSA), from 2009-2015. In line with SITSA's mission to secure the IT environment of Singapore, especially vis-à-vis external threats to national security which include cyber-terrorism and cyber espionage. Hoo Ming was responsible in leading the national defensive response to major cyber-attacks against Singapore's national critical information infrastructure.
