

Akihiko Fujie, Ph.D

Science Coordinator

Department of Innovative Drug Discovery and Development (iD3)

Division of Strategic Planning and Evaluation

Japan Agency for Medical Research and Development (AMED)

Research background:

Microbiology, Natural Product Chemistry, Infectious Diseases

Educational Background:

Univ. of Tsukuba, BA & BS in Applied Biochemistry, 1983 & 1985

Univ. of Tokyo, visiting researcher, 1995-1996

Stanford Univ., visiting researcher, 1998-1999

Univ. of Tokyo, Ph.D. in Agricultural Chemistry, 2002

Industry Background

1985-2005	Fujisawa Pharmaceutical Co., Ltd., Exploratory Research Laboratories, Drug discovery research from microbial natural products (Micafungin)
2005-2009	Astellas Pharma Inc., Fermentation Research Laboratories,
2009-2013	Astellas Pharma Inc., Research Planning & Administration, Drug discovery research from microbial natural products
2013-2015	National Institute of Biomedical Innovation, Center for Innovative Drug Discovery and Development (iD3)
2015-Present	Japan Agency for Medical Research and Development (AMED), Department of Innovative Drug Discovery and Development(iD3)
